

1 **ABSTRACT OF THE DISCLOSURE**

2 The present invention relates to a bodyboard structure including a
3 base board having multiple outer surfaces; and a plastic film enclosed around
4 all of the multiple outer surfaces of the base board in a close and seal manner,
5 thereby protecting the entire bodyboard structure. The present invention also
6 relates to a bodyboard structure including a base board having multiple outer
7 surfaces and a bottom face; a bottom plate mounted on the bottom face of the
8 base board; and a plastic film enclosed around all of the multiple outer surfaces
9 of the base board in a close and seal manner, thereby protecting the entire
10 bodyboard structure.
